

# GEOGRAPHY 2050: COOPERATION & CONFLICT IN A CHANGING CLIMATE

## Poster Exhibition: Call for Proposals

The American Geographical Society (AGS) is accepting proposals for the Poster Exhibition section of the upcoming AGS Symposium, *Geography 2050: Cooperation and Conflict in a Changing Climate*, to be held November 21 and 22, 2024 at Columbia University.

Posters will be presented at the Symposium's Poster Exhibition and featured in a Digital Exhibition on the Geography 2050 website. They will be available for Symposium participants to examine throughout the event's two days. Poster presenters should make themselves available near their posters to interact with attendees during program breaks.

Proposals will be reviewed by a committee of leading academic researchers and business leaders. A limited number of proposals will be accepted, with priority given to interesting, creative, and practical ideas directly related to the main themes of the Symposium.

Posters can cover specific research projects, innovative ideas, or novel geospatial applications. They should be presented to appeal to the very diverse audience of the Symposium. The main themes for the Symposium are included here:

- **Climate Migration, Refugees, and Interstate Tension**
- **Environmental Security and Sustaining Peace**
- **Managing the Global Commons**
- **The Geo-Ethics of Geo-Engineering**
- **Observing Conflict and Cooperation Globally, Regionally, and Locally**
- **Environmental Treaties and Agreements**
- **Can GeoAI Foster Collaboration or Enhance Conflict?**
- **The Future Geography of Climate (In)Justice**

<b>September 18</b>	Deadline for Poster Proposals
<b>September 18-23</b>	Review of Proposals
